

BuildCert

We continue to offer BuildCert inhibitors in gel, liquid and inhibited antifreeze.

Magnetic Filter

Our 22mm magnetic filter is proving popular with our customers. The unit has a unique patented bottom mounted air bleed valve. Patent GB2490898 was awarded in October 2013. Our European patent has also been granted. During 2017 we are launching a vertical in-line version.

Customer Satisfaction Survey

We have added our customer satisfaction survey to our website so that you can now send us feedback on our performance at any time rather than wait for our annual survey.

Carbon Smart

We continue to work on cutting our carbon emissions. We achieved the Carbon Smart Gold award yet again in March 2016 – the latest version of the report is available to download.

Following the cessation of the E.ON Climate Change Levy exempt scheme we are now purchasing BIOMASS renewable electricity from Haven Power.

Celebrating 35 years

While we congratulate our competitors Sentinel for 25 years and Fernox for 50 years service to the water treatment industry in 2014, we quietly celebrated 30 years of service in 2012; our Protex inhibitor trademark was registered in 1982 marking the start of our journey.

Renewables

We offer the following renewable technology products:

- Solar Thermal Heat Transfer Fluid
- Solar Thermal (internal) Cleaner
- Solar (external) Cleaner for PV and Solar Thermal
- De-ionised water for rinsing Solar Thermal circuits

New Products

Electrolytic Scale Inhibitors in 22mm

Part L Compliance kits containing:

Cleaner

BuildCert Inhibitor
